01-01.py

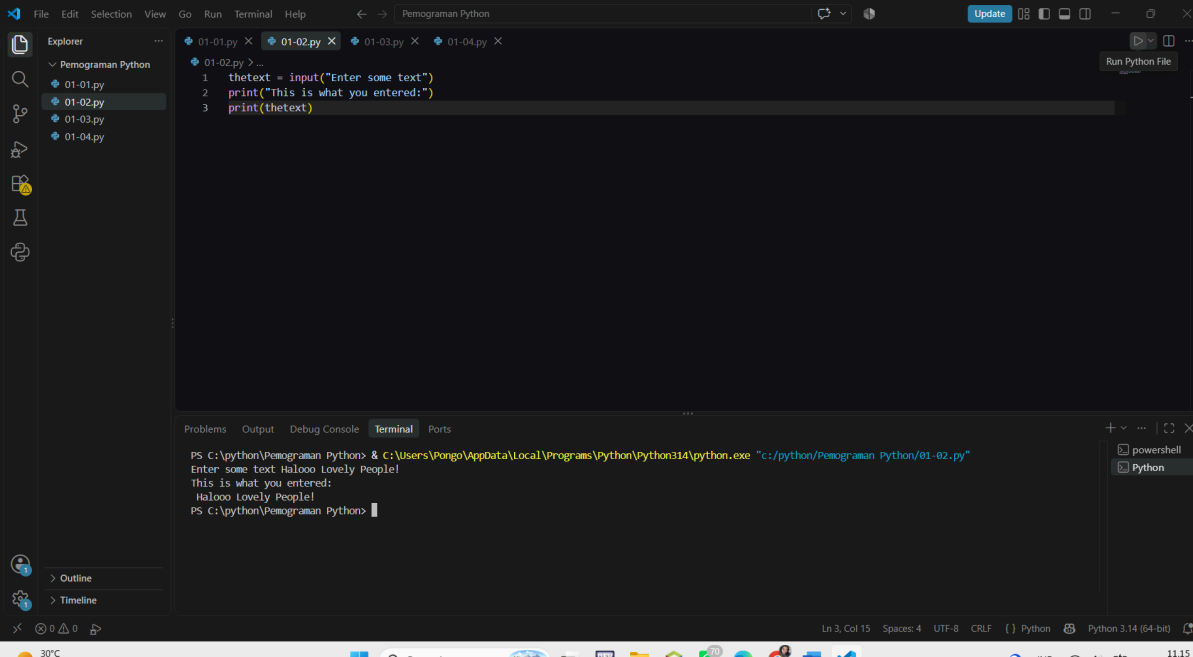

The screenshot shows the Visual Studio Code editor with a file named `01-01.py` open. The file contains a single line of Python code: `print("Hello, World!")`. The Explorer sidebar on the left shows the file structure. The Terminal panel at the bottom displays the command `python.exe "c:/python/Pemograman Python/01-01.py"` being executed multiple times, resulting in the output `Hello, World!` being printed to the console. The status bar at the bottom indicates the file is at line 1, column 25, using UTF-8 encoding and CRLF line endings.

```
File Edit Selection View Go Run Terminal Help
01-01.py
1 print("Hello, World!")

Problems Output Debug Console Terminal Ports

```

01-02.py

The screenshot shows the Visual Studio Code editor with a file named `01-02.py` open. The file contains three lines of Python code: `thetext = input("Enter some text")`, `print("This is what you entered:")`, and `print(thetext)`. The Explorer sidebar on the left shows the file structure. The Terminal panel at the bottom displays the command `python.exe "c:/python/Pemograman Python/01-02.py"` being executed. The output shows the user entering `Enter some text Halooo Lovely People!`, followed by the program printing `This is what you entered:` and `Halooo Lovely People!`. The status bar at the bottom indicates the file is at line 3, column 15, using UTF-8 encoding and CRLF line endings.

```
